

The Business User's New Best Friend

► THE NEW GOLD STANDARD IN BUSINESS CLASS COMPUTING.

The B53J redefines business computing with several "firsts." It is the first notebook to feature AMD Eyefinity™ for improved productivity, the first with a Sonata® Long Life Battery that comes

with a three year battery warranty, and the first with a three year global warranty plus a one year accidental damage protection. It also features a scratch-resistant aluminum casing, Intel® vPro™ support, and docking support. Tested to a much higher standard than the typical notebook, the B53J is more reliable in an environment where downtime is unacceptable.

B53J Notebook

With Intel® vPro™ Technology, PCs can be fixed and maintained remotely, reducing maintenance costs.

ASUS B Series notebooks are covered by an industry-best three year global protection, and a one year accidental damage protection.

AMD Eyefinity technology boosts productivity by supporting up to two additional independent display outputs.

Docking station support allows users to quickly connect peripherals, power, and communication devices (docking station sold separately).

World's first laptop with a standard Sonata Long Life Battery, which lasts up to three times as long as a normal battery and comes with a 3 year warranty. **

The Intel® Anti-Theft feature will automatically disable the laptop if it is lost or stolen, protecting private data.
